

NOS. 29, 58, 68 FOOT PRESSES

INSTRUCTIONS AND PARTS LIST

NOS. 58,68 - 5 TON PUNCHING POWER 2" HOLE THRU 16 GAUGE MILD STEEL

**NO. 58 AND 68
FOOT PRESSES**

SPECIFICATIONS	29	58	68
Capacity	5 tons	5 tons	5 tons
Depth of Throat	10"	18"	24"
Height of Throat	5 3/4"	5 3/4"	5 3/4"
Length of Stroke	1"	1"	1"
Adjustment of Ram	3/4"	3/4"	3/4"
Die Space with Stroke Down & Adjustment up	5"	5"	5"
Diameter of Punch Shank Hole in Ram	1"	1"	1"
Depth of Punch Shank Hole in Ram	1 1/4"	1 1/4"	1 1/4"
Slug Hole clearance	3" x 5"	3" x 5"	3" x 5"
Bed Plate Holes - Center to Center	6 3/4"	6 3/4"	6 3/4"
Floor Space Required	18" x 25"	18" x 34"	18" x 40"
Weight	375 lbs.	485 lbs	535 lbs

Standard equipment includes : One side gauge, one depth gauge, one F8 and F28 Punch Holder, one 20 and 40 Die Adaptor, one F 2 3/4 die shoe, one set 1/2" punch and die, one set stripper arms, and A7 stripper plate.

ROPER WHITNEY OF ROCKFORD, INC.

INSTRUCTIONS

CARE: Oil ram gibs and toggle assembly daily.

OPERATION: To change punches, loosen punch retainer bolt nuts and punch retainer set screw. Remove punch holder.

To change dies, pivot die shoe forward. Remove die or die adaptor and replace with desired die or die adaptor. Return die shoe to proper position. Lower punch thru die. Align die so clearance is evenly distributed around punch. Tighten die shoe bolt nuts and recheck alignment.

TOGGLE CONNECTING LINKS: If toggles are not positioned correctly the press will punch hard or lock. Correct by loosening or tightening ram lever stop screw with foot treadle depressed.

RAM ADJUSTMENT: Punch should enter die approximately 1/16". Toggle connecting links should be in the correct position as shown in the illustration. To correct adjustment:

1. Check to see that connecting link toggle position is correct.
2. Remove front cover plate and reposition wearing plates to achieve correct penetration.

RAM LOOSENESS: Loosen gib bolts on R.H. gib and remove one gib shim. If still loose, repeat on L.H. gib.

FOR MAXIMUM OPERATOR SAFETY DO:

1. Read and understand this manual.
2. Use only punches and dies marked with a **W** or **R-W** designed for this tool.
3. Be sure you punch within the five ton capacity of this tool. Type and thickness of material versus final hole size will give you this tonnage.
4. Wear safety glasses.

FOR MAXIMUM OPERATOR SAFETY DO NOT:

1. Use punches and dies that are chipped or dulled.
2. Punch over capacity of the tool.
3. Nibble. Punch a full hole not a half hole as punch may contact die.
